

The voice of parks and green spaces in the Midlands

The Midlands Parks forum is a young and vibrant charitable organisation whose trustees have been part of the East and West Parks Forums for over 30 years. They have extensive experience as local authority green space officers, industry experts, and as part of charitable green space organisations.

As an umbrella organisation, we are dedicated to raising standards, developing networks, partnerships and collaborations. Please visit our web site to see the breadth and scope of parks management learning events during the last year, with collaborations and partnerships with national agencies, government advisers, and case studies from around the midlands. Our goal is to equip users of our organisation with mutual support, information, skills and knowledge to help them make well-informed decisions, which help raise the standards of parks and green spaces within the Midlands region.

User benefits:

- Access to a network of green space professionals, advisers, agencies and leading community organisations within the Midlands.
- Regular forums, events, workshops, webinars and an annual conference. (10 per year)
- Visits to outstanding green spaces with case studies of best practice from peer groups.
- Ongoing learning and development.
- Access to funding information.
- Monthly newsletters with sector news, funding information, reports and research.
- Contribution of articles or information to monthly newsletters.
- Eligibility for discounted conferences and workshops, including offers from The Landscape Institute and The Heritage Trust Network.
- Membership covers up to three members of local authorities/parks trusts and universities at in person learning events, with unlimited access to webinars.
- Presentations and webinars accessible via web site for all users.
